FULL PAPER STRUCTURE

Papers should be written in English.

A single document should be uploaded to the system which consists of both the Title Page and Main Document. On the Title Page, presenter of the paper should be marked, if there are two or more authors.

**Title page** consists of the title of paper which is not more than ten words (in bold uppercase letters in Times News Roman 12 type size), author(s) name, present position, complete postal address, telephone/fax numbers and e-mail address of each author. Corresponding author and ordering of the author(s) should be indicated. Acknowledgements, if there are, can be cited here.

**Abstract** starts with title of the paper (in bold all uppercase letters in Times News Roman 12 type size) and consists of maximum 150 words. The abstract should state briefly the purpose of the research, the principal results and major conclusions. Right after the abstract a maximum of six keywords should be placed. For those authors who are not interested in publishing the full paper in the Conference Proceedings but interested in only publishing the Abstract, the Abstract has to be an Extended Abstract with a number of words between 300 words and 500 words.

**Main Document** starts with title of the paper (in bold all uppercase letters in Times News Roman 12 type size) and an abstract of maximum 150 words. The abstract should state briefly the purpose of the research, the principal results and major conclusions. Right after the abstract a maximum of six keywords should be placed. Major headings in the Main Document should be written in all uppercase letters and subheadings should be typed in bold upper and lowercase letters. Headings must be concise, with a clear indication of the distinction between the hierarchy of headings.

**Tables and Figures** should be numbered and titled in a consistent manner inside of the text.
Acknowledgements should be included on the title page, as a footnote to the title or otherwise. Individuals who provided help during research should be listed here.

Footnotes should be kept to a minimum for the flow of the text. Thus, footnotes should not be used more than five. Footnotes should be numbered consecutively throughout the paper. Many word processors build footnotes into the text, and this feature may be used. Footnotes should not be included in the Reference list.

Formatting: Writing style of the overall Main Document should be Times News Roman 12 type size. Papers should be written double-spaced (including references). Keep the layout of the text as simple as possible. Most formatting codes will be removed and replaced on processing the paper. Papers should be spell checked and grammatically correct before final submission. Please include page numbers within your submission.

References should be presented in APA style. Authors should cite publications in the text: (Adams, 1965) using the first named author’s name or (Chalip and Costa, 2012) citing both names of two, or (Chalip et al., 2012), when there are three or more authors. Every reference which is cited in the text should be also present in the reference list (and vice versa). For web references, as a minimum, the full URL should be given and the date when the reference was last accessed. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list. At the end of the paper a reference list in alphabetical order should be supplied:

Reference to a Journal Publication:
Reference to a book:

For correct referencing through APA, below links can be advised for more information; [http://supp.apa.org/style/PM6E-Corrected-Sample-Papers.pdf](http://supp.apa.org/style/PM6E-Corrected-Sample-Papers.pdf)

**Ethical Issues:** Author(s) are expected to consider some ethical issues before, during and after their scientific works such as voluntariness, privacy, ethnic, racial and cultural sensitivities of the survey participants and originality of the work. The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable.
